

Bed with or without headboard?

Every bedroom is different and that is why needs a different bed. With or without headboard - we find a perfect solution.

Classic bed

A traditional bed with headboard, never will run out of fashion. A comfortable headboard is necessary if you want to lean back for reading or watching TV in bed. Headboard may be also a real adornment to make you bed the centre-piece of the bedroom. With ornamental aluminium elements or some openings in, the headboard will certainly catch the attention.

Modern bed

A bed without headboard is particularly useful if your bed stands near window sill or other low overhang. Another useful attribute of bed without headboard is a possibility to add some self-made headboard with our own pattern or even a mirror. For many people the choice is rather more aesthetic – with the low line of a bed without headboard fitting in best with a more minimal styling, so popular nowadays.

The final decision depends on our style and preference. And don't forget about the bedroom design and size. To make it easier you can see some of our products below.
