

## Breast Tissue Expander

---

AirXpanders has developed the AeroForm tissue expander, a patient controlled breast tissue expander that could change the field of reconstructive surgery.

AirXpanders Inc. designs, manufactures and distributes the revolutionary AeroForm™ Patient Controlled Tissue Expander. A first for women who choose reconstructive surgery following a mastectomy, the AeroForm [tissue expander](#) does not use intrusive and painful saline injections via syringe needles. The AeroForm patient controlled tissue expander utilizes a needle-free inflation system via a patient-controlled handheld device, which releases specified amounts of air in the form of carbon dioxide
