

How to built fundraising platform in VfundU?

VfundU- A Kickstarter Clone by Cogzidel Technology for designing your fundraising or crowdfunding website, invite fundraisers, donors, and sponsors from the crowd to help fund member's projects. It's a platform where people from around the world can post projects to raise money from groups of investors. VfundU Kickstarter Clone <http://www.cogzidel.com/kickstarter-clone/> is a unique and innovative fundraising or crowdfunding program that lets fundraisers raise funds from the crowd, also known as a fundraising website, or funding platform.

Entrepreneur's biggest difficulty is finding financing for startups and business expansion. It's harder to find bank loans or Venture Capital and more and more Businesspeople opt for online crowdfunding, where money increased in smaller amounts from many sponsors, and equity not lost. That cannot only help a modern business survive, but crowdfunding can help explore consumer taking of their product and further possibilities for growth and expansion. It is clear that your smart move would be to launch a crowdfunding platform like VfundU. Some creators may not feel happy in backing projects publicly. So we have added a feature which allows backers to pledge as private so that the sponsor can maintain privacy. Based on the website owner's requirement, you can get ready the personalized website which built your website in a safe, secure and latest technology. This readily available script has embedded the internet site with all necessary features, modules, and tools which help to operate the fundraising website pleasantly. VfundU crowdfunding script is developed to go with any site quickly. It can easily integrate for any general or niche funding market. VfundU software works well with creative, technology, arts or business startup funding platform.
