

## How to Easily Save Cost of Ink on Printer?

---

The cost of printers has dropped over the past few years, yet the cost of replacement ink cartridges has not gone down at all.

Let's find out if there is a really simple way to reduce cost on printing. Nowadays you can purchase remanufactured or compatible generic cartridges from the selected vendors' web sites with a very low price. Using generic printer ink cartridges and toner are one of the fastest, easiest ways to save money. Please remember that there are many types of printer ink, but usually they come in four colors: Cyan (blue/green part of the color spectrum), Magenta (pink/purple section of the color spectrum), Yellow, and Black.

The cost of printers has dropped over the past few years, yet the cost of replacement ink cartridges has not gone down at all. While most people probably don't see printer [ink cartridges for their inkjet printer](#) and [toner cartridges for their copiers](#) as a major expense, the cost can add up over the time. It can only take three to four printer cartridge replacements before you have exceeded the amount you paid for the printer itself. Fortunately, there are several ways to save money on printer ink and to better control your expenses.

You can conserve ink by printing with discipline. One of the easiest ways to save money on printer ink is to [conserve](#) the ink, or save printer ink. It is important to educate yourself and your employees on ways to reduce the amount of ink you use on a daily basis. By following the next few steps, you can easily reduce the amount of ink your business consumes.

1. Conservation by Making Selection. By only printing the pages you absolutely need, you can immediately cut down the amount of ink. Before you print your document, highlight the portion you need by holding the mouse button and dragging the cursor over it. When you click "Print", check the box next to the "Selection" option. You confirm your print and, only the highlighted area will be printed.

2. Conservation by Using Page Preview. When most people print their documents they don't verify the job first. It isn't until the printer has spit out an extra eight pages that they realize they'd printed too much. By clicking Print Preview before confirming your print job, you can be sure that only the pages you want will print helping you conserve printer ink.

3. Conservation by Printing in Draft Mode first. Unless the documents you are printing need to be of the highest quality, printing in Draft Mode is the easiest way to save money on printer ink. When you click on the "Print" option, the box will appear so you can change the preferences of the job you requested. Click on the box next to Draft Mode and then confirm your print. Your document will print in a lighter shade, thereby using less ink.

Unfortunately, even if you follow these steps, you will soon need to purchase replacement printer ink. Fortunately, there are a couple of other ways to help your business save money in ink.

**4. Use Printer Refill Kits.** Printer Refill kits are clear ways to help you save money on printer ink. Each printer refill kit comes with enough ink to refill your black and color printer ink cartridges three times and the tools you will need to fill the ink cartridge. While there is a significant price difference between printer ink cartridges and printer refill kits, many people shy away from using them because of the time it takes to fill your printer cartridge and the mess it can make if you are not experienced in the refill process.

**5. Buying Generic or Remanufactured Printer Ink Cartridges.** One of the easiest ways to save money on printer ink is by using generic or remanufactured printer ink cartridges instead of using brand name. Some people may turn themselves away from using generic or remanufactured printer ink cartridges because they are not certain that the quality will be as good as their brand name counterparts. But, nowadays there are many excellent vendors who provide high quality Generic/Reman ink cartridges. Make sure to check vendor cites mentioned in Resource Section in this article. Cost can easily be saved by 30 % - 40% which is quite significant.
