

Lafka

The fastest growing grocery delivery service .Lafka is a world wide trading venue for retail. A combination of innovational interface with an advanced logistics system.

Lafka is a world wide trading venue for retail. And as for now Lafka is the fastest growing grocery delivery service .

The key features of Lafka are:

- Search with voice recognition system integrated into it
- An intellectual system of order recognition
- Bot interface that gathers shopping list by means of various Messengers

That's why Lafka is a combination of innovational interface with an advanced logistics system.

The model when the service or commodity is delivered here and now has proven itself to be successful in food tech and is adaptable to almost any niche. Grocery delivery is only the beginning, Lafka startup is going to embrace the whole retail market.

Lafka is a startup company which we have developed a complex software on a turnkey basis:

- Users app: 2 native mobile clients for iOS and Android
- Shoppers app: 2 native mobile clients for iOS and Android
- Backed with several data flows and real time synchronization

Lafka. The future is today.
