

Success Key - How ATTITUDE Plays a Huge Role

The first step in the road to success lies within the importance of our attitudes. Our Attitudes and thoughts dictate our future for better or worse. The wrong attitude is probably the cause of more failure than any other principle, philosophy or strategy.

So before you think about the secrets that will lead you down the road of prosperity, happiness and wealth, let me say this? You must first cover subject of attitude or face the fact that you will never have what you truly want. On that note; we all must make a choice to either go after the lifestyle we truly desire or remain where we are.

Attitude is a choice. It's your choice. It is not based upon feelings it's strictly a mental thing. Attitude is a mental position toward a particular fact, state or situation. Again that means that you have control over it. Sometimes you can't change a situation, but you have control over how you react to it. We all do and there are no excuses with this.

The fact that you are happy, joyful and excited or sad, depressed and angry is a direct result of the attitude that YOU have chosen to take at that time. It's not like you have to be in that mood. You really have just chosen to be.

It took me a long time to figure this out for myself that this is the way it really works. But now I can honestly say that it is 100% true. Every time I am in the state of having a bad attitude it's because I choose to dwell on something that I should not have.

Now obviously there are some things that occur in life that will cause it to be more difficult to control but the key is not to stay there too long.

Here's why?

"As a man (or person) thinketh in his heart so is he". Basically this means that our thoughts (or attitude) are what determine our future. You have the power to create or destroy your own future based upon your thoughts.

So have a great attitude and think big...

I bargained with Life for a penny,
And Life would pay no more,
However I begged at evening
When I counted my scanty score.

For life is a just employer,
He gives you what you ask,
But once you have set the wages,
Why, you must bear the task.

I worked for a menial's hire,
Only to learn, dismayed,
That any wage I had asked of Life,
Life would have surely paid.

The bottom line is whether we believe we can or believe we can't, we're right. In order to receive we must first ask and then believe that it's possible. You must believe that you can have an abundance of money, have a great marriage, be the best parent or that you can actually create any lifestyle that you desire.

The truth is..."You are in control of your future the minute you choose to be and you can create absolutely anything you truly desire to and it all starts with attitude."

Attitude

by Chuck Swindoll

The longer I live, the more I realize the impact of attitude on life. Attitude to me is more important than facts. It is more important than the past, than education, than money, than circumstances, than failures, than successes, than what other people think or say or do.

It is more important than appearance, giftedness or skill. It will make or break a company, a church, a home. The remarkable thing is we have a choice every day regarding the attitude we will embrace for that day. We cannot change our past, we cannot change the fact that people will act in a certain way. We cannot change the inevitable. The only thing we can do is play on the one string we have, and that is our attitude. I am convinced that life is 10% what happens to me and 90% how I react to it. And so it is with you, we are in charge of our attitudes.

Do not allow what other people say or do to dictate your attitude. People will without even realizing it try and bring you down. You have to fight against it. The statement that misery loves company is more often than not a true statement. It's not always the person's fault that they are disrupting you because they are not aware of it, but you need to be so that you can knowingly choose to remain in the right attitude.

A miserable person or even someone who just happens to be in a bad mood (we're all guilty of this sometimes) will try to identify with you by bringing you into their negative mental state. They don't purposely do it, it's just a reflection of their inability to control their attitude at that time.
