

## Sure Signs He's Cheating - How to Remove the Doubt

---

Here are the signs that should warn you that something somewhere is wrong - and chances are high that that thing is an affair.

If you have some reasons to believe that your man is cheating on you, you may be interested in having sure signs he's cheating. Of course, there are times when we would wish that other people would have clear pointers to their mistakes to avoid a lot of doubt, and one of these areas is where cheating is involved.

However, many things in life are not as clear-cut as we would like. One of the things that make relationships really worthwhile is when we accept our mates by faith. Unfortunately, there are some people who take advantage of the faith that their partners put on them. This is why it is good to know how to interpret some signs so that you can determine whether your partner is in the latter group.

If you are asking whether there are [sure signs he's cheating](#), then the simple answer is no. However, there are signs that you should not take for granted. While you should not rush to judge your partner when you see just one of the signs, a combination of several signs makes a strong case for cheating.

**Here are the signs that should warn you that something somewhere is wrong - and chances are high that that thing is an affair.**

### **Spend a lot of time from home.**

If your husband seems fond of spending his time somewhere else instead of at home, it is not something you should take for granted. If he is genuinely working overtime, as he may tell you, then there should be a corresponding increase in his income.

### **Change of behavior in [using the cell phone](#)**

Men generally do not enjoy spending a lot of time speaking on the phone or chatting online. If your husband seems to have discovered the beauty of doing this, be alert. If he has always been like this then you should not worry. However, if he suddenly calls or texts too much - and does not share with you what is going on - there are chances that he is hiding something from you.

### **Lack of interest in sex**

In general, men love having sex, and if your husband seems to have lost interest in initiating it, be warned. When did he last ask you for sex? If he does not seem to bother you with his sexual desires, perhaps it is because he is getting fulfilled elsewhere. However, you should still not jump to conclusions. Find out if there is nothing else bothering him or he does not have any health problem.

Although these are not sure signs he's cheating, when your husband displays all of them, it is time to take a closer look.
