

What are the measures to maintain privacy in Yahoo Messenger?

Yahoo is a secured mailing platform which provides the wide variety of features to its users. You can generally use this service for sending and receiving emails. Many of the commercial or non-commercial sectors totally rely on this for performing their various tasks or actions that are the main reason why it is reign over the world very rapidly. Everyone is praising this to the user.

Though it is giving 1 TB of emails storage, good user interface, easiness in accessing, and you can also link another email account with it. It is also giving its messenger service which is a very user-friendly through which you can chat with any of the mailing services, you can send pictures, GIFs, and video through by very simple procedures. It is very quick and simple. The most affectionate feature of its resend features which is not common on any social networking site. You can also like the received photo for showing you love and chat with many friends by creating groups. You can also switch to emailing service.

It has so many services, you just need to explore them if you want further information regarding same then Yahoo support brings you all information for you in minimal time.

No matter whether you are using this service or others, safety and privacy are your basic concern and you need to take attention when you are using messenger service. The below-given steps are some of the privacy tips:

- The person that you are chatting may reveal these chat information to others.
- The other person can download your profile picture from whom you are chatting with.
- Do not select the “save my id and password” option because anyone can access your account from the same device.
- Check your firewall setting carefully.

These are some certain measures for making your account secure and private. If you have a doubt related to your account then you can go for help which you get from [Yahoo Technical Support Number](#) +(61)-283206047, it is the technical team who listen you're all concern completely and give an appropriate answer regarding your question. It is a toll-free number so do not think anymore and make call them.
